

Prism Preventive Maintenance

Streamline building maintenance procedures and extend equipment lifespan.

Proactive maintenance is key to maximizing asset value and minimizing costly repairs. Prism Preventive Maintenance offers a comprehensive solution to standardize equipment management, schedule maintenance tasks, and extend the lifespan of your building's critical assets.

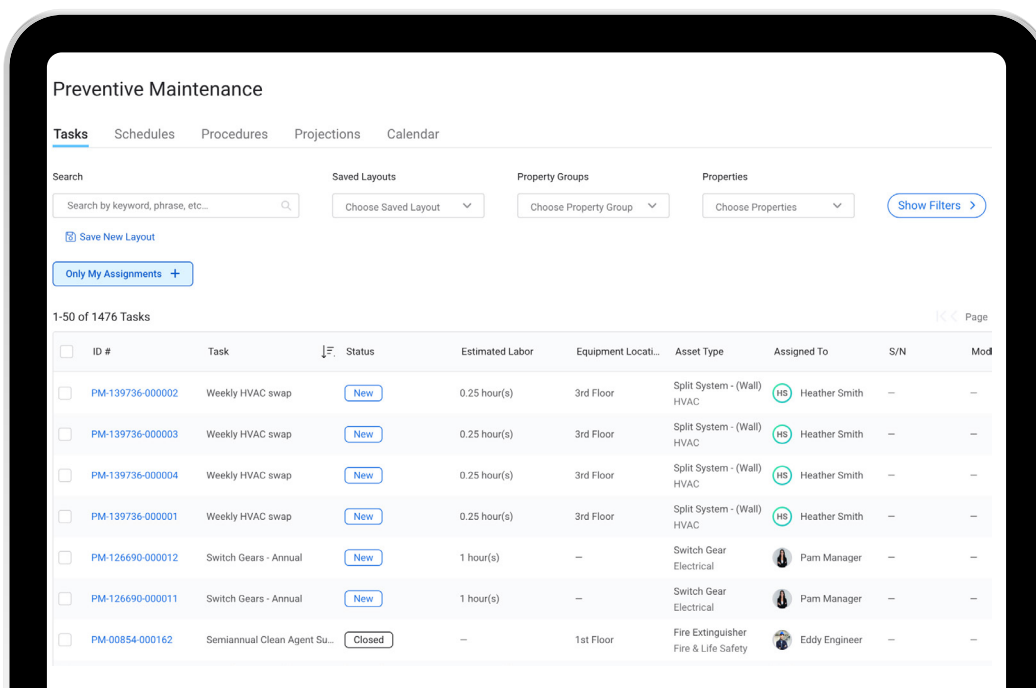

Benefits of Prism Preventive Maintenance:

Gain full visibility across your portfolio and drive smarter decision-making.

View schedules, maintenance tasks, equipment, comments, and related photos across all buildings in one convenient location

Monitor equipment health and team productivity with real-time issue tracking, while capturing readings against preventive maintenance tasks

Access a full history of all services performed on equipment and gain insight into past tasks and issues

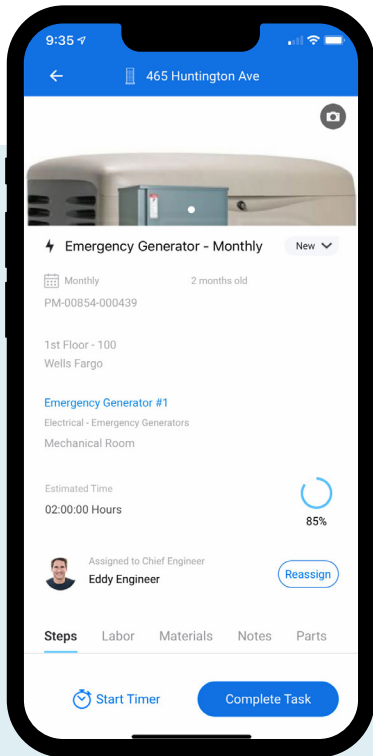

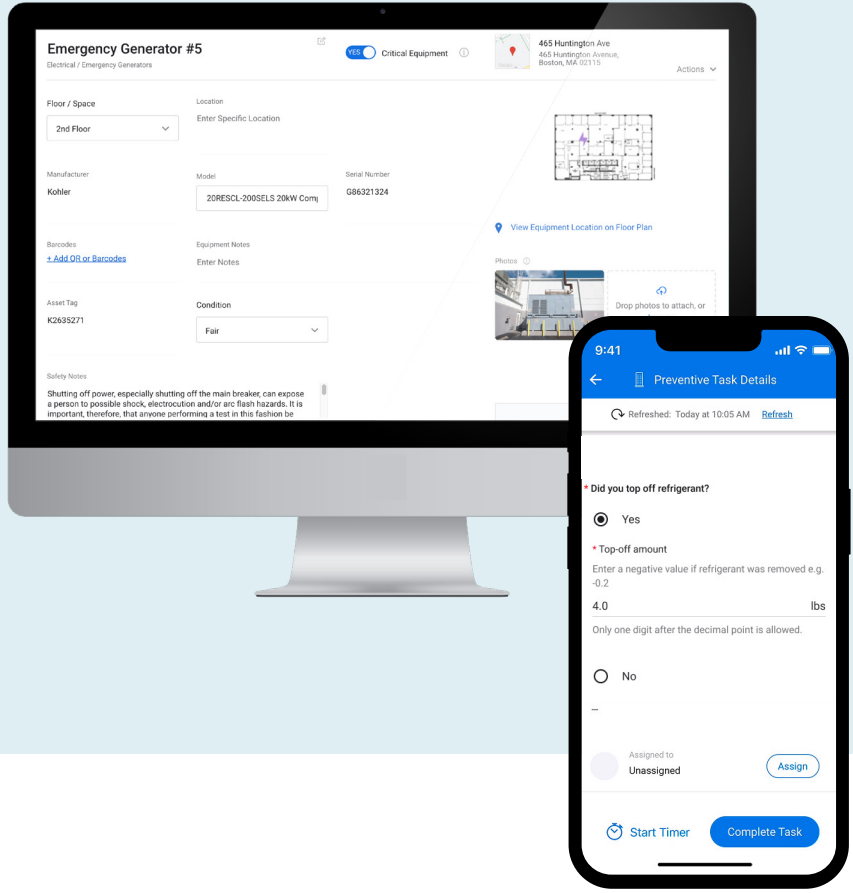

Extend the life of your assets by 10X to reduce the need for costly replacements.

Improve preventive operations to ensure your assets perform at peak efficiency for extended periods.

Anticipate equipment end-of-life cycles to allow for proactive and cost-effective capital planning.

Consistently track maintenance completion to prevent minor issues from escalating into major, expensive repairs.

New! Easily log refrigerant usage and top-offs when completing preventive maintenance tasks.

Improve maintenance efficiency and consistency across all teams at your buildings.

Empower engineers to manage and update tasks on-the-go and “offline” with the Prism Mobile app

Create consistent maintenance schedules, manage workload, and ensure engineering hours are properly allocated

Upload equipment guides and instructional videos to provide on-demand learning and promote organizational best practices

Keep your building and equipment operating at peak efficiency
